

**Petite & Mars**

# **Turbo 5<sup>IN</sup>1**

*More than just a bike*

# A bike that grows with your child

*1,5 - 5 years  
up to 25 kilograms*

[www.petiteetmars.com](http://www.petiteetmars.com)

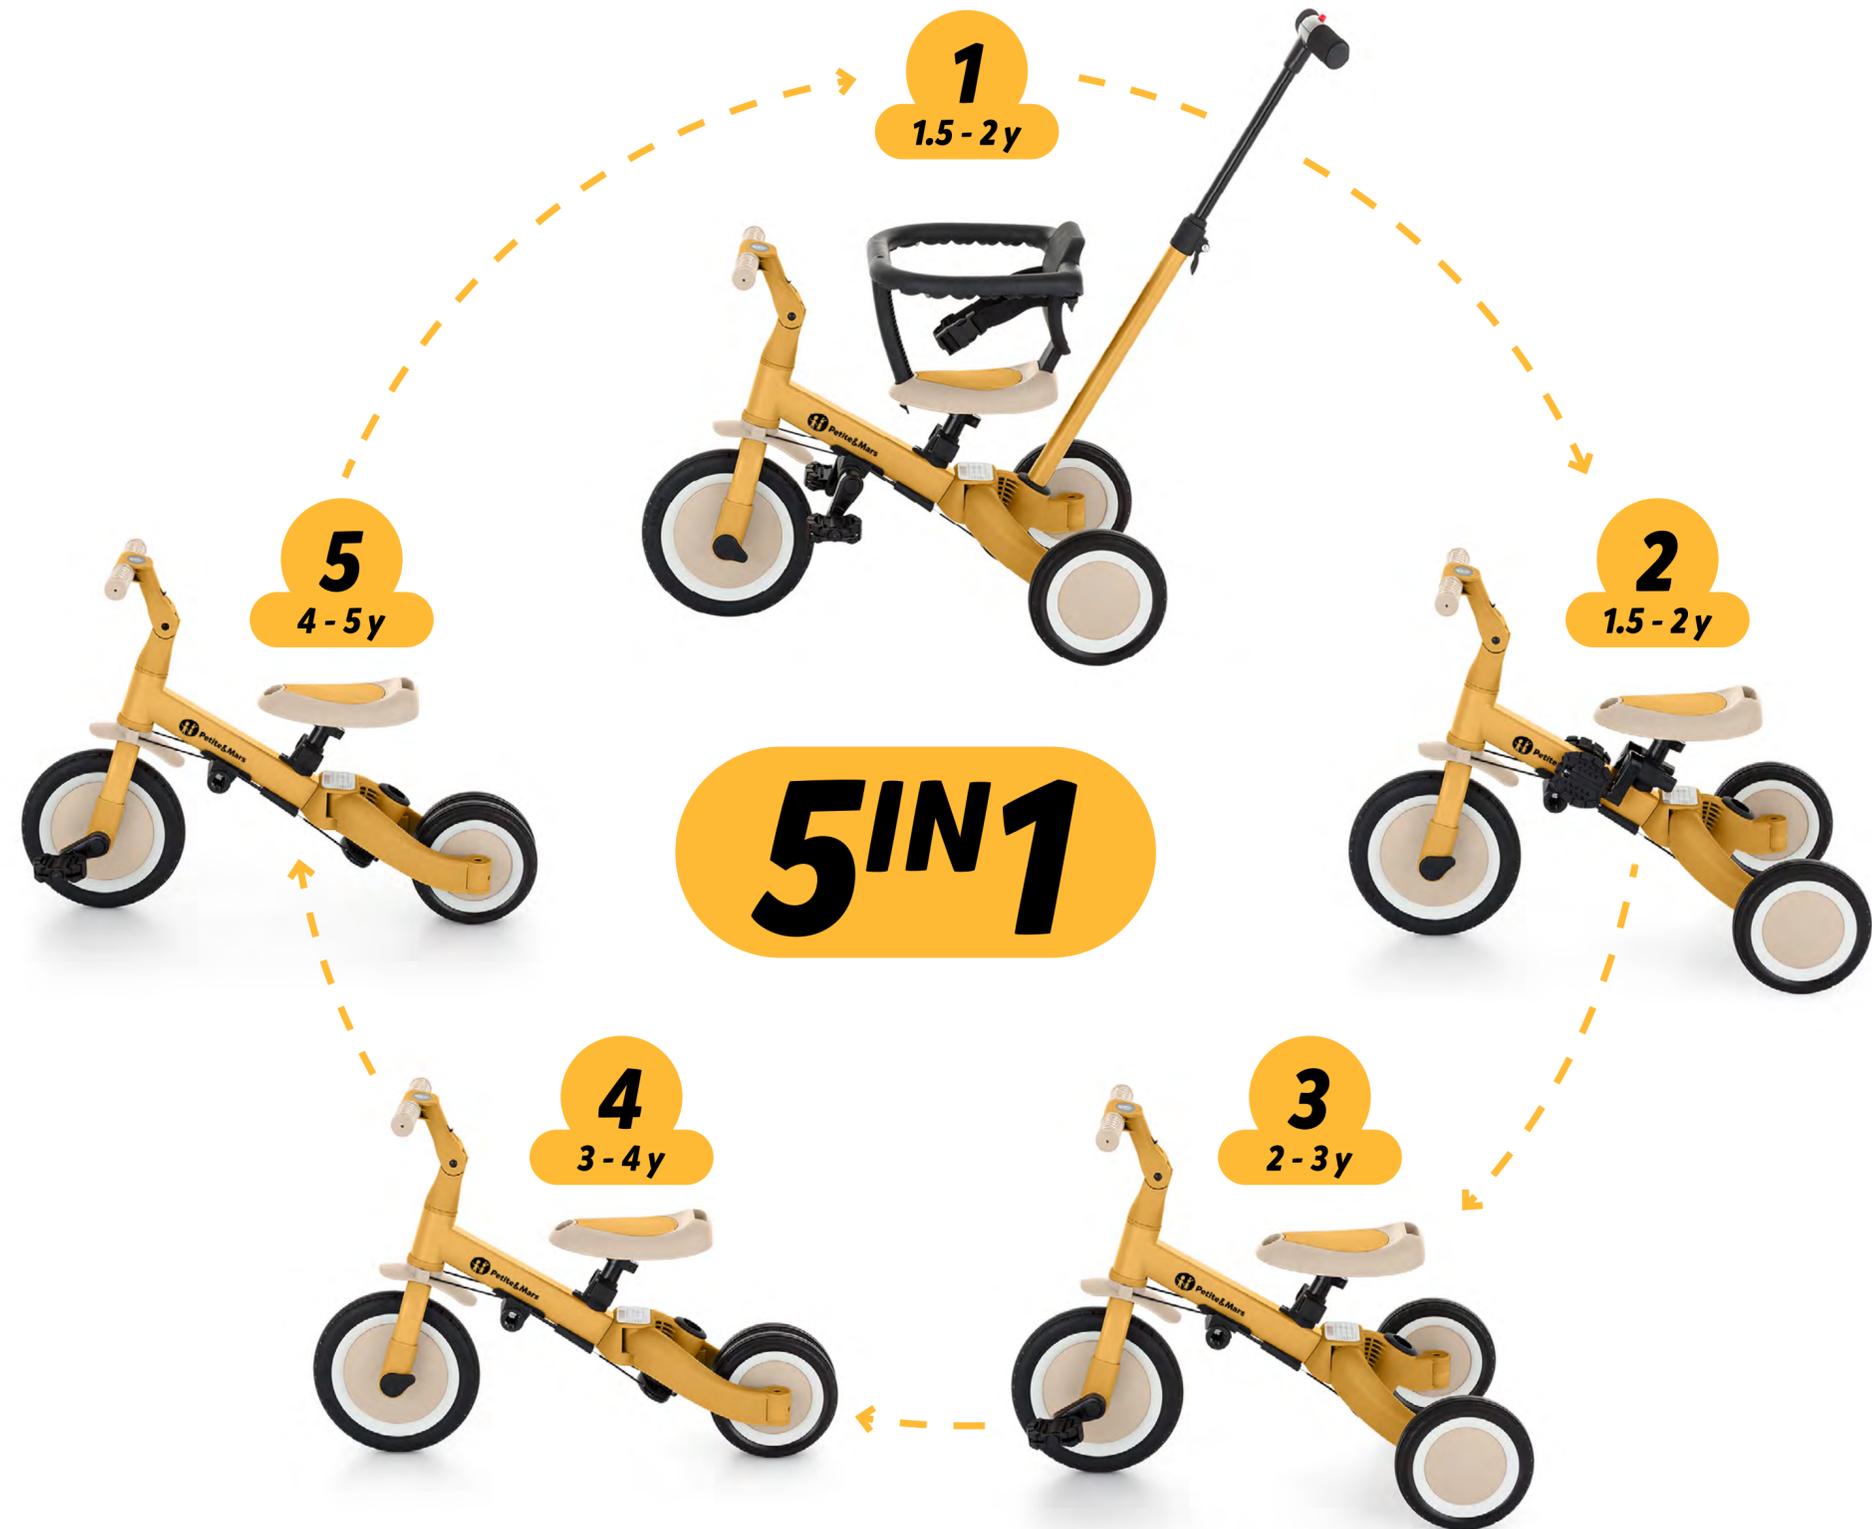

# Multiuse of the bike

**5 different modes**  
depending  
on the child's  
age and skills

1. Tricycle pushing mode
2. Tricycle sliding mode
3. Tricycle mode with pedals
4. Balance bike mode
5. Bike mode with pedals

Simple transforming from one mode  
to another does not require tools!

*rubber grips*

*height adjustable  
2 positions*

Handles with rubberized grips ensure a comfortable and safe ride, as the child's hands will not slip.

Simply push the black button to adjust the handle height to 2 positions and choose the one that suits your child's height.

*adjustable saddle  
with seat belts*

*height adjustable  
handle bar  
4 positions*

The handle height can also be adjusted on the parent handle. Choose from 4 levels of height adjustment to make pushing the tricycle comfortable.

The child's safety is ensured by a removable seat with seat belts.

The saddle can be adjusted to a height of 31 - 37 cm so that the baby can comfortably reach the floor.

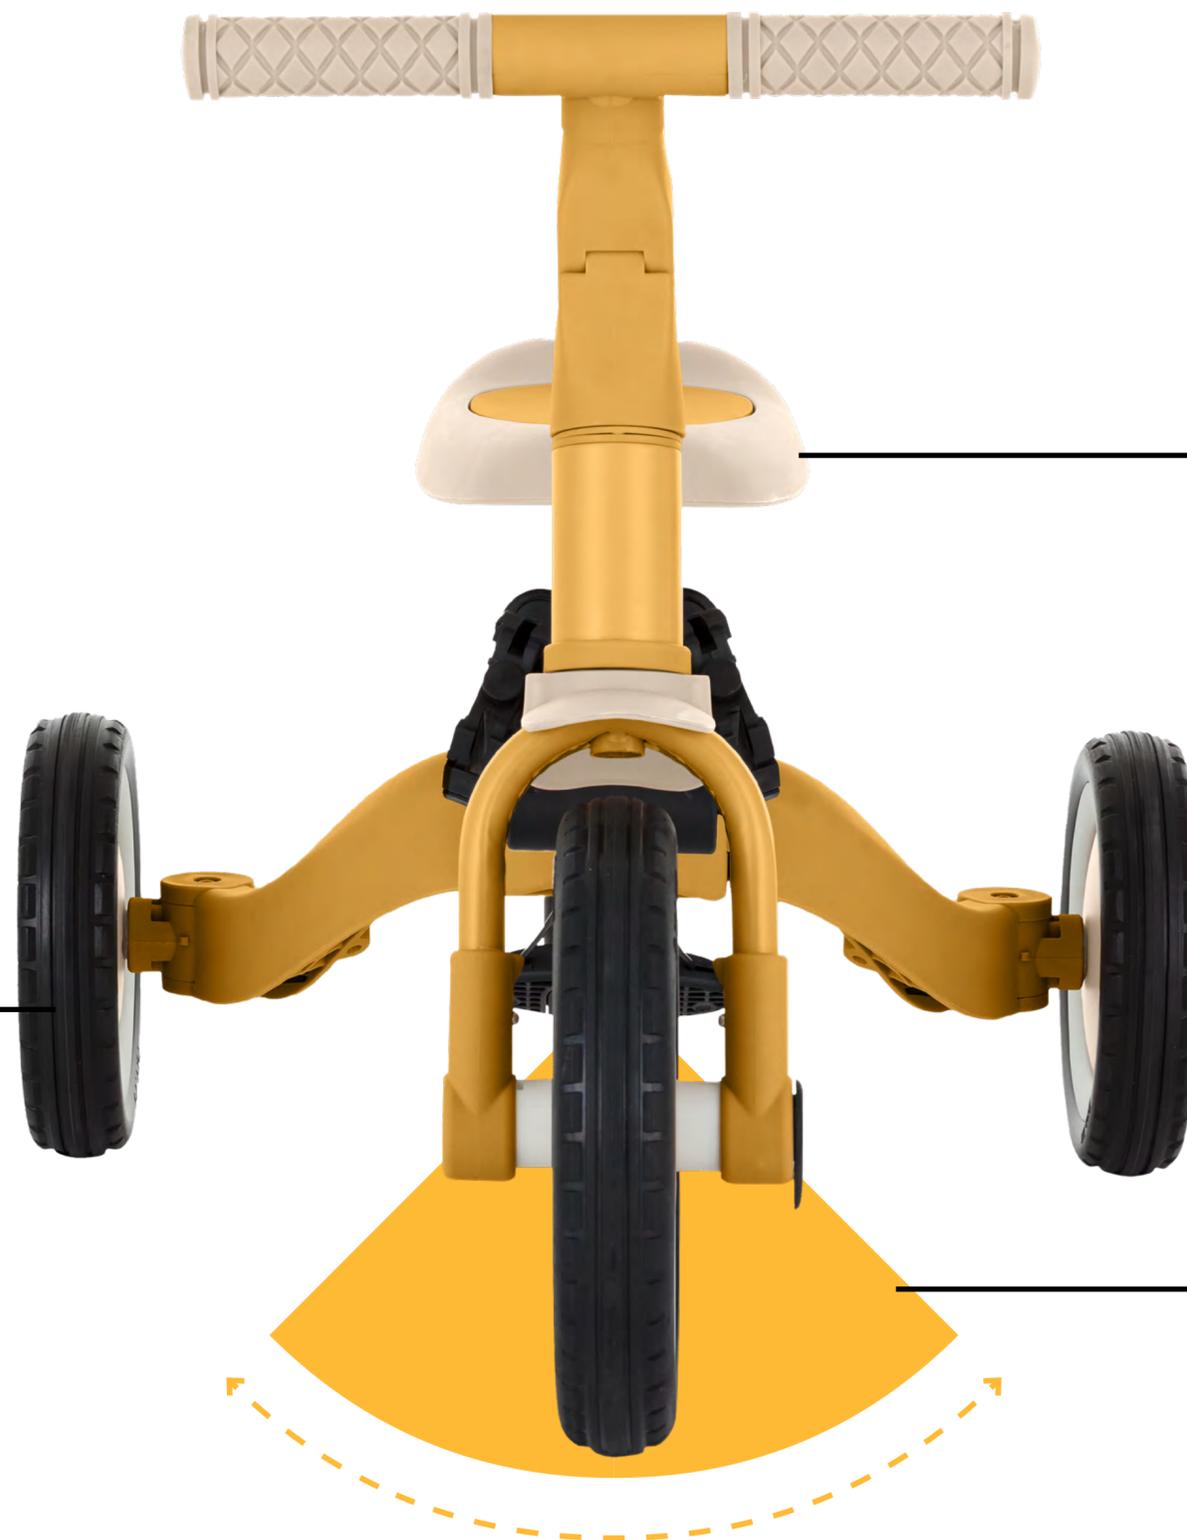

The wheels are made of high quality, durable rubber and can handle off-road riding.

The front wheel is rotatable. It turns by twisting the handlebars, but can also be controlled by the parent using the parent handle.

*durable rubber wheels*

*adjustable saddle*

*front wheel rotation*

# Technical Features

[www.petiteetmars.com](http://www.petiteetmars.com)

*removable pedals*

*open wheels: 45 cm*

The tricycle can be easily transformed into a balance bike or a bicycle without any tools.

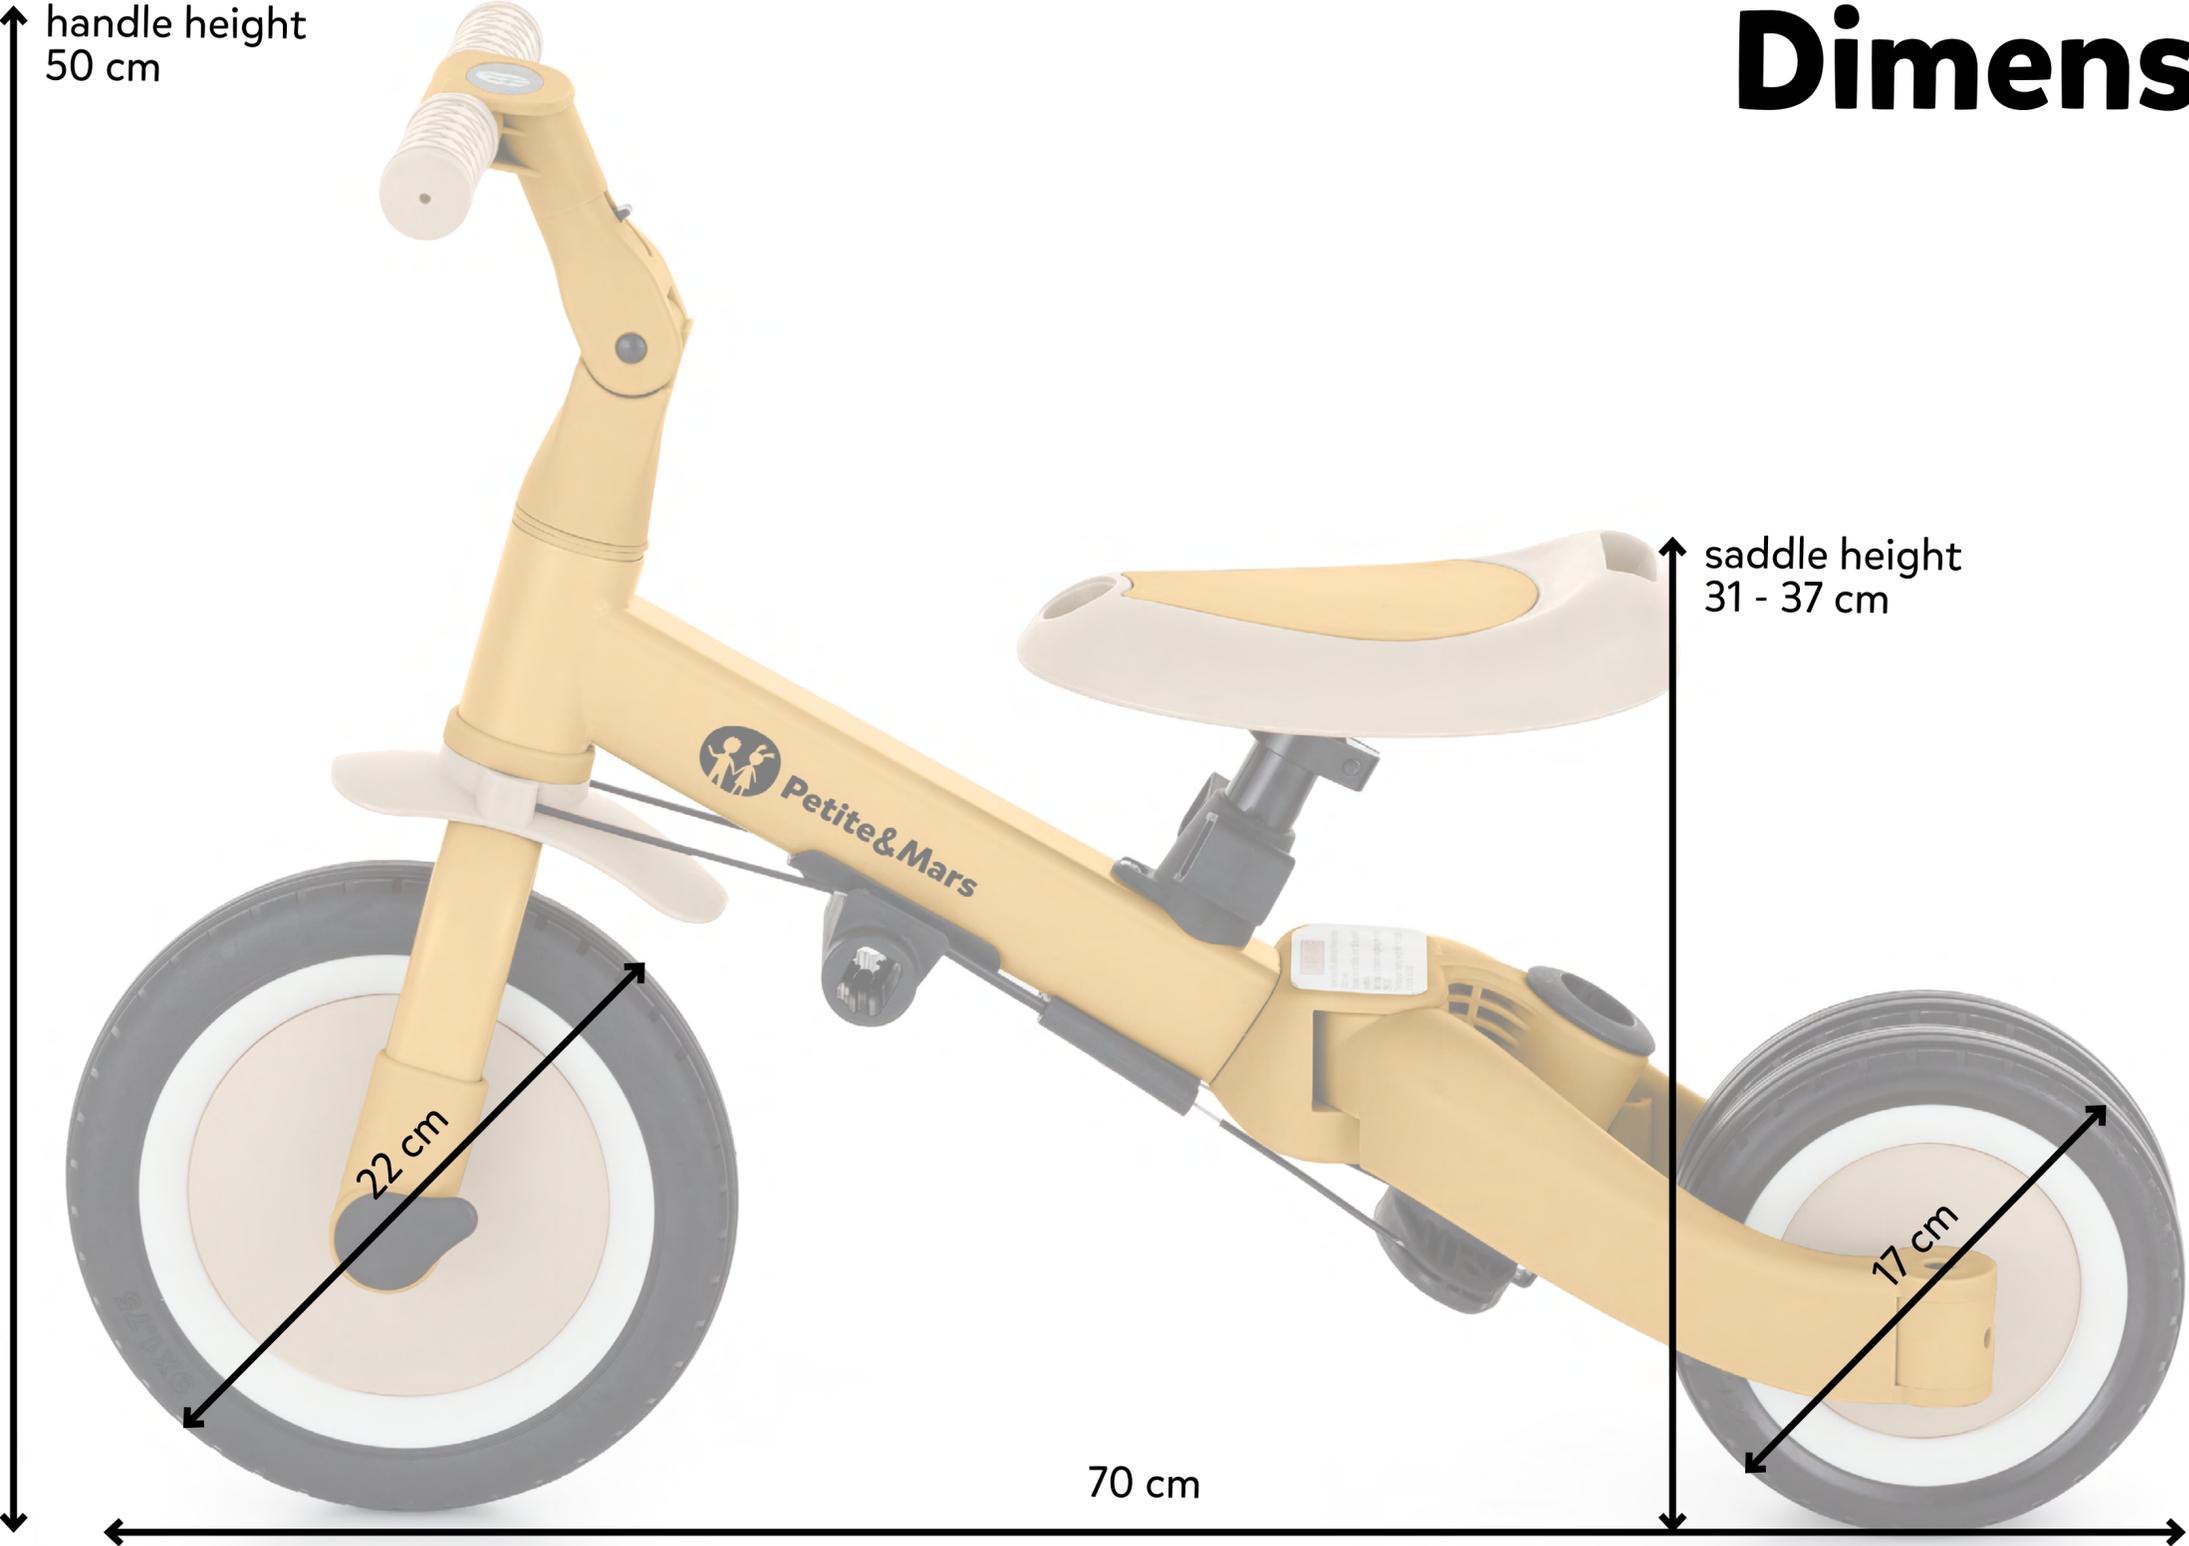

Simply remove the pedals and turn the rear wheels inside and connect them together by pressing a button.

It's that simple.

*close wheels: 8 cm*
